Education

BSc (Hons) in Software Engineering

BSc (Hons) in Software Engineering - Second Class (Lower Division), University of Plymouth, UK
UK

Advanced Certificate Course

Advanced Certificate Course - NSBM Green University, Sri Lanka
Sri Lanka

Negombo South International School

Projects

LegalAI

I created a web-application that can upload and has access to all the legal documents and has an Gemini AI API with a subscription system that answers questions about Sri Lankan legal landscape I used MongoDB, express, react and node to complete this project

Technical Skills

MERN Stack (MongoDB, Express.js, React, Node.js)

Python, SQL

REST API development

React.js, JavaScript

GIMP (Graphics/Design) and Video Editing

IoT Development - ESP32

Work Experience

Software Engineer (Full Stack Developer)

Zucus.in

02/2025 – 08/2025

- Began as a **Frontend Developer** and progressed into **Full Stack Development**, taking on responsibilities across the entire application lifecycle.
- Built and maintained modern **React.js** components using **shadcn/ui** for consistent, accessible, and maintainable frontend design.
- Integrated **Node.js** and **Prisma ORM** for backend logic and database operations, managing data flow across the stack.
- Assisted in **database management**, performed **schema migrations**, and optimized data models for performance and reliability.
- Enhanced **API logic** and improved **Zod validations** to strengthen data integrity and application security.
- Collaborated using **GitHub version control** – resolved merge conflicts, created and reviewed pull requests, and merged tested code into the main branch.
- Participated in **feature testing and pre-production validation** to ensure stable deployments.
- Utilized **TanStack Query** for efficient server-state management and smooth data synchronization in React.
- Contributed to **API documentation** using **Swagger**, improving backend communication and team efficiency.
- Demonstrated adaptability, initiative, and strong problem-solving skills while transitioning from frontend to full stack development.

The project

Contributed to a confidential client project (under NDA), developing frontend features with React.js and managing server state using React Query. Implemented backend APIs with Node.js and Prisma for database management and utilized Docker for containerization. Delivered end-to-end solutions with seamless frontend-backend integration while following best practices and ensuring code quality.

Movie Ticket booking System

Created a movie ticket booking system using java servlets for the backend and using java, css, java script along with adding a payhere API used a SQL database

StitchMonitor IoT System

Developed an IoT system using an ESP-32 board and sensors, along with a PHP-based web application and SQL database, to monitor the efficiency of sewing machine operators in the Sri Lankan garment industry.

DLE/student portal APP

Created a mobile app where students can login students and staff can login the staff can give marks and students can view marks and get study material used Kotlin for this and the database was firebase

Garbage Spotting and collecting system

Created a web-application that people can upload photos of the place and location of the garbage and the garbage collectors could assign teams to clean the city with this new found system used google map API, php and for the database I use an sql database

Hobbies & Interests

- 3D printing and design
- Electronics and IoT projects
- Building and maintaining personal computers

Software Engineer (Full Stack Developer Intern)

Oxzon AI

10/2024 – 03/2025

- Contributed to the development of a full-featured **e-commerce web application** using the **MERN stack (MongoDB, Express.js, React, Node.js)**.
- Implemented and integrated **RESTful APIs** and **frontend components** to support product listings, authentication, and user interactions.
- Assisted in **database design** and deployment tasks, ensuring smooth hosting and environment setup.
- Collaborated closely with team members on **end-to-end application workflows**, demonstrating strong communication and adaptability.
- Proactively identified and solved issues during integration, ensuring consistent and reliable performance across features.
- Recognized for **attention to detail, teamwork, and initiative** in supporting both frontend and backend development efforts.
